[COURSE](#) [COMMENTARY](#)

Webshow Slide Presentation

- **View Slides with Audio**

Move to any slide in any sequence.

NOTE: Due to security and compatibility complications with various web browsers, the Webshow slide presentation is no longer available. Instead, the Presentation Notes files for each session contain the content which was previously in the slides.

Control Audio Playback

- **Control of Audio Playback**

Volume on/off and level, play, pause, continue, rewind (drag slider).

NOTE: Due to security and compatibility complications with various web browsers, the Webshow slide presentation is no longer available. Instead, the Presentation Notes files for each session contain the content which was previously in the slides.

Separate Audio Recording

- **Audio Without Slides**

Slide recordings combined into a separate listening resource for use without slides when away from the computer, etc.

NOTE: This supersedes the individual audio recordings that were available within the Webshow slide viewer.

Download Webshow

- **Offline Use**

Each session includes a link to download the entire webshow to your computer.

NOTE: Instead of downloading individual Webshow slide presentations, we now provide the ability to download the entire course.

Study Bible

- **Digital Bible Included**

Bible verses are automatically linked to an online Bible. Hovering the mouse over a Bible address produces a pop-up containing the verse. Click on the pop-up to open the chapter at the verse.

Study Library

- **Library of Bible Resources**

See the "Bible Study" link on the front page of the website. Or go to: www.spiritandtruth.org/id/wl.htm to open the **Wordlinks Bible Study Library.**

Commentary

- **Commentary on the Book of Daniel**
Accessible by clicking on **COMMENTARY** at the top of each Presentation Notes file.

Hebrew and Greek

- **Original Language Fonts**

Where Hebrew or Greek appear, the word or phrase is transliterated for those who are unfamiliar with the original languages or lack access to the special fonts. Examples:

Ἰσραηλ [*Israēl*] יִשְׂרָאֵל [*yisrā'ēl*]

Hebrew is best viewed using the *SBL Hebrew* font available from <http://www.sbl-site.org/Resources/default.aspx> Greek is best viewed using the *Gentium* font available from http://scripts.sil.org/cms/scripts/page.php?site_id=nrsi&item_id=Gentium.

If these fonts cannot be accessed, the *Ezra SIL* and *Galatia SIL* unicode fonts can be obtained from our website: <http://www.SpiritAndTruth.org/fontsu/index.htm>.

Transliteration, which includes overbars, underbars, and dots, is displayed using the *Arial Unicode MS* font.

Special fonts are not needed for Hebrew or Greek in print or PDF formats.
